

a

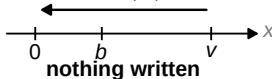

b

c

the taking's write: one comparison, two cases, no partial hole

the face: $v, b, r \rightarrow 0$

sparse: share at the Node $\leq W_{\text{rec}}$:
the hole to 0 by the face Rule3 presents; the count down by one

dense: share at the Node $> W_{\text{rec}}$:
nothing written, the levels stand; the quantum moves in the books

$W_{\text{rec}} = (\text{the laid share} + \text{count div } 2) \text{ div count}$
 v : the level Rule3 would write without the face

d

the ledger

before

after

the arriving record's count

1

0

its levels and remainder at the drawn Node

v, b, r

0, 0, 0

the NodeReader's record, its parts g / e

1 / 0

0 / 1

the click line, the NodeReader's report, the only measurement: the window's index, the NodeReader, the family and the part, the count before and after, the NodeReader's own clock; no Node

the declaration in the NodeReader's file: its Nodes, two or more connected (one Node with a record of its own: its parts g, e and the lifetime); the world's one draw, a body's reader's own seed
