

the six Ports: the cube's group, 48;
its rotations, 24; the octahedron, the front

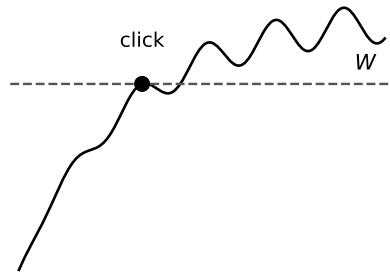

along a body diagonal:
the hexagon, the cubic pattern

on the board: the block is the detector, its rung W ;
the circle $\mathbb{Z}_N$ the record's clock; light through it

the click: the form crosses the rung,
the only thing that leaves the board

$X^2 + Y^2$ in the cells, against the count
